

Where can I buy 3 kV capacitors?

Do not show again and take me directly to the Cart. 3 kV Capacitors are available at Mouser Electronics. Mouser offers inventory, pricing, & datasheets for 3 kV Capacitors.

Are 3 kV ceramic disc capacitors available at Mouser Electronics?

Filter the results in the table by unit price based on your quantity. Filter the results in the table by unit price based on your quantity. Mfr. No: 3 kV Ceramic Disc Capacitors are available at Mouser Electronics. Mouser offers inventory, pricing, & datasheets for 3 kV Ceramic Disc Capacitors.

What is a ceramic capacitor?

A capacitor is a passive electronic device that stores electric charge. Ceramic capacitors consist of two or more alternating layers of ceramic material as the dielectric and metal layers acting as the non-polarized electrodes. Applications include automotive, bypass, decoupling, filtering, RF, and ESD protection.

What is a capacitor in parallel?

Capacitors in parallel refer to capacitors that are connected in parallel when both of their terminals are connected to the terminals of another capacitor. Additionally, the voltage (V_c) connected across all capacitors connected in parallel is the same.

How many kvar is a capacitor?

Lower dielectric losses in the order of 0.12w/kVAr. Capacitor up to 700 kVAr, 22 kV, 1Ph, and 50Hz unit size has been manufactured and tested. Bigger capacitor unit sizes are also available on demand. Universal Cables Ltd (UCL) entered into manufacturing of capacitors in the year 1967 under the technical collaboration with "Toshiba" of Japan.

What are the different types of capacitor units?

Capacitor units are connected in various formations of star /double star and delta, depending upon customer's requirement /applications and applicable protection schemes. Capacitor banks are available in all the ratings to suit the customers /system requirement.

Ceramic capacitors consist of two or more alternating layers of ceramic material as the dielectric and metal layers acting as the non-polarized electrodes. Applications include automotive, bypass, decoupling, filtering, RF, and ESD protection.

High voltage capacitor banks (3.3Kv to 132KV / 220KV) are formed by series parallel combinations of these units & connected in various formations of star / double star and delta, depending upon customer's requirement / applications and applicable protection schemes. We have supplied hundreds of banks of ratings varying between 2-24 MVAR With ...

High voltage capacitor banks (3.3Kv to 132KV / 220KV) are formed by series parallel combinations of these units & connected in various formations of star / double star and delta, depending upon customer's requirement / applications ...

Displaying products for 3kv Capacitors - from our range of leading brand manufacturers. Select the properties you would like to see added to the columns at the end of the table. The ...

Ceramic capacitors consist of two or more alternating layers of ceramic material as the dielectric and metal layers acting as the non-polarized electrodes. Applications include automotive, ...

The 564R30GAQ27 is a radial leaded lower voltage ceramic single-layer Disc Capacitor for DC and pulse high voltage applications. The 564R series capacitor consists of a ceramic disc of which both sides are silver plating. Connection leads are made of ...

Displaying products for 3kv Capacitors - from our range of leading brand manufacturers. Select the properties you would like to see added to the columns at the end of the table. The 564R30GAQ10 is a radial leaded lower voltage ceramic single-layer Disc Capacitor for DC and pulse applications.

S152K47Y5PR63K7R - 1500 pF \pm 10% 3000V (3kV) Ceramic Capacitor Y5P (B) Radial, Disc from Vishay Beyschlag/Draloric/BC Components. Pricing and Availability on millions of electronic components from Digi-Key Electronics.
