This location of Genco Battery is located on Soldier Road in Nassau.

Not only are lithium-ion batteries widely used for consumer electronics and electric vehicles, but they also account for over 80% of the more than 190 gigawatt-hours (GWh) of battery energy storage deployed globally through 2023. However, energy storage for a 100% renewable grid brings in many new challenges that cannot be met by existing battery technologies alone.

For most consumer electronics, the battery shelf life for a lithium-ion battery can be between 2 and 4 years. Consumers and companies often consider when to recycle lithium-ion batteries once the scrap piles up. People can sell lithium-ion batteries for recycling purposes due to the materials' composition and use.
