Battery Clip Technology

What is a battery clip & contact holder?
Our battery clips, contacts and holders are designed with leading edge technology in mind, to accommodate all major manufacturers' batteries. Available in a wide range of materials and mounting styles including surface mount, thru hole and off board, some of the applications include:

What is the difference between battery clips and contact blocks?
Battery clips and blocks are designed to directly mount cylindrical cells to PCBs, with both through hole and surface mount options available. Although battery clips are less reliable than battery holders, contact blocks can deliver increased reliability while still retaining the cost savings of battery clips.

What is a keystone battery holder?
Keystone's holders are specifically engineered to withstand the rigors of abuse and recharging cycles associated with the 18650 Lithium-Ion cell usages. Keystone's new battery holders are ideal for 3.7 volt, high energy, lower weight mobile electronics, industrial and telecomm applications that have circuit protection to prevent battery damage.

What is a battery holder?
Battery holders for coin cell, cylindrical or rectangular batteries are used to secure battery (s) from one to 10 or more cells in series and parallel configurations. By using the Co-Browse feature, you are agreeing to allow a support representative from DigiKey to view your browser remotely.

What is a shielded battery strap?
Shielded battery straps incorporate a shrouded housing to protect 9 Volt battery contactsby insulating and shielding them. The shrouded straps prevent tampering and keeps the battery contacts from coming in contact with other conductors. The unique design also protects the battery contacts from dust,dirt,contamination and physical damage.

What is the difference between economic and snap-in battery contacts?
Economical contacts are designed to "slide-in" to the battery compartment of electronic equipment. Coil spring contacts are designed with a unique spring tension ability and they accurately adjust to variations in battery length. Snap-In Battery Contacts.
