

ULC aims to develop a 50 GWh Gigafactory to produce scalable modular battery cells through a phased development approach to use strategies based on deep partnership, including licensing of innovative next-generation technologies. ...

Experts of the EU Project "New Code of Ukraine on the Subsoil" are preparing an analytical review of advanced battery technologies in Ukraine, which will also explore the connections and potential value chains between the needs of battery manufacturers in the EU ...

The Russian invasion of Ukraine which emerged as a humanitarian and geopolitical crisis in the European region is also creating inevitable threats to the global supply chains of the automotive industry, e-mobility in particular. As is the case with every other industry in the 21 st century, the value chains of electric vehicles and their batteries are inherently ...

Ukraine aims to be a key player in Europe"s energy future, leveraging its natural resources, rare earth minerals and its technology and ingenuity as a logical part of the plan to ...

Ukraine aims to be a key player in Europe"s energy future, leveraging its natural resources, rare earth minerals and its technology and ingenuity as a logical part of the plan to move forward. However, much of that ambition and potential is on hold due to the ongoing war. With considerable proven reserves of oil and [...]

JYC is an experienced manufacturer of storage batteries. We produce more than 200 kinds of batteries such as telecom backup battery, front terminal battery, slim battery, and front access battery, with a production capacity from 0.8ah-3000ah, which is the most powerful choice for Ukraine"s energy shortage.

JYC is an experienced manufacturer of storage batteries. We produce more than 200 kinds of batteries such as telecom backup battery, front terminal battery, slim battery, and front access battery, with a production capacity from 0.8ah ...

With Ukraine decimated and under Russian influence, the production of battery raw materials that Europe needs for electrification has been suppressed and the Western world will need to continue to rely on China for ...
