

Battery with inverter outdoor power supply

What kind of batteries do portable power stations use?

The two main classes of batteries you'll see right now in portable power stations are LiFePO4 and NCM. LiFePO4 batteries utilize lithium, iron, and phosphate, and are considered safer and longer lasting than other batteries. They are, comparatively, lower in price for the power they deliver.

Should you buy a LiFePO4 battery for a portable power station?

The good news for anyone in the market for a portable power station is that the industry as a whole is moving toward LiFePO4 batteries. One of the most important factors in choosing a portable power station is the amount of energy it can store, known as its energy potential.

Can a battery-operated power station be run indoors?

Additionally, battery-operated power stations can be ran indoors. This means if you are trying to power a small appliance in your house during a power outage, you can bring the power station inside the house and set it up next to the appliance. That wouldn't be possible with a gas generator.

Is a portable power station a good investment?

A portable power station is a great investment and can be a real lifesaver. If you're looking to get one, we've got you covered with the best options. There are many uses for a portable power station.
