Why do we need solar panels in South Africa?

Solar panels are fast becoming one of South Africa's most necessary requirements, due to the fact that this country has one of the most unstable and unreliable power grids in the world. The constant threat of power outages is more than an inconvenience factor, but continual outages can seriously damage our electrical and electronic equipment.

Who is Galaxy Solar?

Galaxy Solar was founded because of the frustration dealing with the constant load-shedding and lack of sufficient reliable electricity supply in South Africa, and so we started investigating the possibility of offering solar installations in and around Bloemfontein.

How are solar cells made?

Solar cells are made from crystalline silicon semiconductors or wafers. These are made from the element silicon, a hard and brittle crystalline solid that is the second most abundant element in the Earth's crust after oxygen. A single silicon crystal can be grown and then cut to very thin wafers.

Qcells' Dalton factory will manufacture nearly 30,000 solar panels per day. Beyond Dalton, the investment includes the development of a fully-integrated solar supply chain factory in Cartersville, Georgia. The highly anticipated Cartersville factory will manufacture solar ingots, wafers, cells and finished panels.
