

Does solar work in Washington?

Knowledge is power... Yes, solar does work in Western Washington and the Puget Sound. The sun is producing electricity whether we see it or not. The cooler climate is ideal for solar panels, and since dust is not an issue in our area, the panels are low-maintenance. Washington's incentives are also among the best in the country.

Is going solar a good idea in Washington?

In Washington, going solar can lead to significant savings due to a state-mandated net metering policy, a 30% federal tax credit, and tax exemptions for both the solar panels and the installation. Keep in mind that it doesn't rain all the time in the state.

Can solar panels save money in Washington state?

Property owners in Washington state can save money by installing solar panels. Despite the state's reputation for being cloudy, the solar outlook in Washington is quite bright. Many residents are taking advantage of the economic and environmental benefits of solar power.

What is Solar Washington?

Solar Washington is a nonprofit organization that focuses on providing solar educational resources and programs for the general public and the industry.

Is Washington State a good place to install solar panels?

Washington State is a good place to install solar panels, as it offers solid incentives for doing so. The state has long supported renewable energy.

Is solar energy a viable option for Washingtonians?

Solar energy is becoming increasingly affordable and feasible for Washingtonians. As solar technology rapidly improves, equipment prices are dropping and more solar incentives are being introduced on a national, state, and local level.
