

# Canberra lithium battery transport box price

Can I transport a lithium battery in Australia?

This article doesn't cover the requirements for air and sea transport of Lithium batteries. For this you will need to refer to the Civil Aviation Safety Authority and Australian Maritime Safety Authority regulations. Battery Rescue currently offers a Used Lithium Battery recycling service to its Western Australian customers only.

How do you store a lithium battery in Australia?

Common solutions available in Australia involve the placement of these batteries in a fire-retardant bag that is then placed inside a sturdy cardboard box. The batteries are often mixed with non-lithium batteries which is allowed under the P909 requirements. Non-Handheld Lithium Batteries

Can I ship a lithium battery cross-border?

There are regulations attached to the cross-border shipping of batteries to ensure they travel safely. These regulations vary depending on the type of batteries. Lithium batteries, for example, are classified as Dangerous Goods, so not all types of lithium batteries are accepted by DHL Express which you can check here.

How does battery rescue transport used lithium batteries?

Battery Rescue's service for recycling of Lithium and other non-lead acid batteries delivers safe and regulation compliant transport of used Lithium Batteries, destined for recycling. You can find a summary of the often complex Dangerous Good Regulations governing the transportation of Used Lithium Batteries for disposal or recycling.

Can a lithium battery be stored in a BRD bin?

Note: Under the ADGC packaging requirements for Lithium batteries only 12kg or larger batteries are permitted in the BRD Bin. For smaller batteries a UN Certified Device /Container must be used. You can find our recommended safety instructions for stacking large lithium batteries in the BRD Bin here.

Can a lithium ion battery be transported in a non authorised package?

For Lithium Ion cells if the Watt-hour rating doesn't exceed 20Wh and for Lithium Ion Batteries doesn't exceed 100Wh, then the cells /batteries can be transported in a strong but non-authorized package. This includes all small hand-held batteries and most power tools. If you're unsure check the battery labels or safety data sheet.
