

What is European lithium?

"European Lithium aims to fast track the development of the Project which has the potential to become a major producer of lithium in Europe." European Lithium aims to fast track the development of the Project which has the potential to become a major producer of lithium in Europe.

Why is Europe investing billions in Li-ion batteries?

The clean energy revolution has created a need to secure lithium supply, a key component in the dominate Li-ion battery space and satisfy growing Global and European demand. Having lagged behind, Europe is now investing billions of Euros to transform its auto industry and become a leader in electrified mobility.

When will European lithium start producing lithium hydroxide?

The Company is aiming to commence lithium hydroxide production at the project in Q1 2025 (subject to funding, approvals by the Austrian government and COVID-19 restrictions). "European Lithium aims to fast track the development of the Project which has the potential to become a major producer of lithium in Europe."

What is European lithium's Wolfsberg Lithium Project?

Having lagged behind, Europe is now investing billions of Euros to transform its auto industry and become a leader in electrified mobility. European Lithium's Wolfsberg Lithium Project is in the heart of Europe's burgeoning cluster of battery manufacturers. Confirmation *You agree to add your personal information to our mailing list.

Why is the European Union focusing on battery research?

Considering the global competition, the European Union is focusing substantial research efforts to create an improved European battery technology. Under the EU Research and Innovation programme Horizon 2020, numerous calls for proposals focus on different aspects of battery research.

How can elibama improve the environmental impact of lithium-ion batteries?

In general, the technologies developed or improved within the ELIBAMA project contribute to a significant reduction in the environmental impacts of lithium-ion batteries, either by providing improvements in the anode (replacing PVDF and NMP by latex and water) or by improving the cathode (dry blend process or aqueous based process).

ELIBAMA (European Li-Ion Batteries Advances Manufacturing) is a 3 years" project, aiming at enhancing and accelerating the creation of a strong European automotive battery industry ...

Presentations Company Presentation May 2022 Corporate Fact Sheet May 2022

Across Europe, electric vehicles have adopted lithium-ion battery technologies as standard. As a pivotal player in this burgeoning market, European Lithium is helping to meet this growing ...

In April 2020 EMH entered a JV with CEZ a.s. to develop Cinovec and expanded the scope of the project to enable Cinovec to become Europe's first vertically integrated battery metal producer. As a result, Cinovec is fully funded to final investment decisions. EMH is currently progressing the Definitive Feasibility Study (DFS) for the construction of a 29,386 tpa lithium hydroxide plant to ...

European Lithium is participating in programmes launched by European and National bodies (EIT, Greenpeg, LithRef, etc.)
o Part of a syndicate of acclaimed industry players
o Aim: represent the entire value chain of a sustainable raw material and battery production in Europe
Advanced-stage discussions regarding offtake agreements

A number of lithium battery projects have been announced in Europe which will considerably increase European lithium demand. Why European Lithium? 100% owned, high grade project with mining licence awarded. Substantial work performed by previous owners. Opportunity to fast track development to meet EU and global demand . Close to largest lithium import markets in EU - ...

European Lithium (ASX:EUR)(FRA:PF8)(VSE:ELI)(NEX:EUR) is aiming to become the first producer of sustainable battery-grade lithium hydroxide in Europe, by developing the Wolfsberg Lithium Project ...
