

Why is nickel strip a good choice for rechargeable batteries?

99.98% Purity Nickel Strip for improved battery performance. Greater power transmission with electrical conductivity 15-20% higher than cast products. Download Our Whitepaper Now! Our high purity 99.98% nickel strip offers major advantages in rechargeable battery production.

What grades of nickel strips are available?

High-quality pure nickel strips including Nickel 200, Nickel 201, and Nickel 207. Nickel strip used for battery applications like Ni battery tabs, and battery strips. AMETEK nickel strips are available in UNS N02200 and UNS N02201 grades

Why should you choose a pure nickel strip?

Tight control over low level alloying additions is also an inherent advantage of our process. Our pure nickel strip is the premier material for battery connections in critical applications including: power tools, oil pipelines, hybrid electric vehicles, consumer electronics, pacemakers, aerospace and defense.

What is high purity nickel strip?

Our high purity 99.98% nickel strip offers major advantages in rechargeable battery production. We manufacture high purity nickel strip to specific customer requirements using wrought powder metallurgy technology. Our process enables us to produce high conductivity materials used in collectors and connector tabs for many battery chemistries.

Choose the nickel strips" size according to the current you would like to draw from battery pack, the higher current, the thicker and wider nickel strips. And you can achieve higher current rating by increasing the series connections between parallel battery group, or using multiple layers of nickel strips on battery packs.

Buy nickel strips for your 18650 or 21700 battery pack. Huge variety of sizes. Fast and reliable shipping from the EU. In stock.

99.7% Pure Nickel (Laboratory Tested - Report available upon request.) Looking for high-performance, reliable cylindrical batteries? Fogstar Wholesale is your one-stop shop... From compact single-bay models to high-capacity eight-bay chargers, we have the perfect...

Battery Pack Welding Nickel Tabs We offer pure nickel strip for battery pack manufacturing, now in pre-cut tabs. There's nothing more annoying than cutting nickel so let us do it for you with our computerized cutting machines! This is ...

Choose the nickel strips" size according to the current you would like to draw from battery pack, the higher

current, the thicker and wider nickel strips. And you can achieve higher current ...

Whatever your needs, pick up new nickel strip battery with ease at Alibaba's wholesale store. Powdered nickel and anodes are another appealing option in some situations. It will work well if you are thinking about ordering supplies for electroplating. Use Ni for your coatings and add ductility and resilience where it's essential.

PRICE PER METER!Dimensions T 0 15 mm - B 29 1 mm CHEMICAL COMPOSITION NICKEL ≥ 99.7
Suitable for 21700 This product does NOT contain battery spacers or batteries! It is only the nickel strip It is only the nickel strip

Features Overview Low-resistance Anti-corrosive Good Electrical Conductivity Specifications Material: Ni200/N6 Pure Nickel Purity: 99.7% Thickness: 0.1mm/0.15mm/0.2mm Width: 5mm/8mm Usage: Building lithium battery pack, power bank, nickel electroplating, etc. Tips Choose the nickel strips" size according to the current you would like to draw from battery ...
