Replace Lead Acid Batteries with Lithium for Marine and RVs . A standard flooded lead-acid battery can have about 2500 cycles at 25% DoD; A standard sealed lead acid battery can have about 1200 cycles at 25% DoD; Unlike lead-acid, lithium batteries don't have a cycle curve under 80% DoD. Beyond 80%, the cycle count can drop dramatically. A ...

What is a Lead-Acid Battery? A lead-acid battery is an older technology that stores energy by combining sulfuric acid and lead plates. The acid is what holds the energy and the lead plates are what allow the acid to be electrochemical. Lead-acid batteries are easy to store large amounts of energy. You can charge and discharge them multiple ...
