

Should you buy a home with solar panels?

Help with your home value: If you plan to sell your home down the line, having home solar panels can be a major perk to buyers and can help increase your home's value. Key step toward going green: Since solar is a renewable resource, you can shrink your carbon footprint.

How do I choose the best solar panel for my home?

When choosing a solar panel brand, be careful to make sure that the company you choose will still be around to honor your warranty. Typically, larger corporations like REC and Q CELLS are safe bets and highly bankable. At the end of the day, the best solar panel for home varies from homeowner to homeowner.

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.

Should I buy or lease solar panels?

If you have the funds, it's better to buy solar panels rather than lease, and that's mostly due to tax credits. The federal government will provide a 30% tax credit for the total cost of the project. This will take a huge chunk off the bill. The sooner solar panels are paid off, the sooner they provide "free" energy.

Where can I buy solar panels?

You can start with CNET's best list of solar panel companies. You can even shop for solar panels at major home goods stores like Home Depot. Stores like this can set you up with professional installation to help you get a residential solar panel setup. Considering Solar Panels?

Should I go solar if I own a home?

It's easiest to go solar if you own your home. If you're a renter or you're part of an HOA, solar can still be worth it. You just need to check with the property owner or homeowners association before making concrete plans.
