Battery Replacement costs between \$362 and \$373 on average. Get a free detailed estimate for a repair in your area.

How much does a battery cost?

Economical batteries do, of course, have an attractive price point, but they generally don't come with as good of a warranty. Many people consider the DieHard Gold is the sweet spot here, as the price is often going to stay under \$200, plus you get a great three-year free replacement. 3. Battery Construction

How much does a car battery installation cost?

If you want to pay to have a mechanic install the battery, that will usually cost you another \$30-\$99. That's because most mechanics have a basic minimum rate that they work for. However, some also offer to install your battery for free providing you buy the new one from them.

Why do you pay a higher price for a cheaper battery?

Sometimes, you will pay a higher price for a cheaper battery because you pay for export and shipping costs to the United States. In this case, you are paying a premium for an otherwise inexpensive battery. The world of batteries is like any other retail market.

How does battery size affect the cost of a car battery?

Battery size and BCI battery group also affect the cost of the battery. If you have a heavy-duty vehicle that requires a larger, more powerful battery, you can expect to pay more for it than for a common passenger car battery. Aside from the BCI group and the purpose of battery, the battery's physical size will affect price.

What affects the price of a battery?

The country of manufacture also affects the price of the battery. Some batteries made in other countries, like China, are less expensive than those made in the United States. You should understand something about the quality control and design in this particular country to make a good decision.
