

# How to install the battery panel on the control panel

How do you remove a battery from a control panel?

Unplug the control panel's transformer from the outlet. You may need the screwdriver to remove the screw that secures the transformer to the outlet. Open the control panel cover either by removing the two screws on the side of the front control panel cover or with the control panel key. Quickly inspect the old battery.

How do you install a new battery?

Place the new battery in the panel in the same spot where the old battery was installed. Firmly push the RED wire connector onto the battery's red terminal, and then do the same with the BLACK wire connector to the black terminal. Plug the transformer back into the outlet and if necessary, screw it back into the wall outlet.

How do you connect a battery to a wall outlet?

Firmly push the RED wire connector onto the battery's red terminal, and then do the same with the BLACK wire connector to the black terminal. Plug the transformer back into the outlet and if necessary, screw it back into the wall outlet. Close and secure the control panel cover.

How do I set up a solar panel?

Note: When setting up your system, the solar panels should be out of the sun or covered for safety reasons.

Step 1: Hook up the battery to the charge controller. Connect the battery terminal wires to the charge controller **FIRST**, then connect the solar panel (s) to the charge controller.

How do I connect a solar panel to a charge controller?

Step 1: Hook up the battery to the charge controller. Connect the battery terminal wires to the charge controller **FIRST**, then connect the solar panel (s) to the charge controller. For detailed reasons, see [Should We Connect Batteries First Instead of Solar Panels to Charge Controllers?](#)

How do I connect a PV battery?

Connect the DC loads. Connect the PV. If applicable, connect the VE.Direct port. The correct connection order is necessary to allow the automatic system voltage detection to setup properly. It is only allowed to connect PV first when the system voltage is manually set before connecting the battery.

Use 12VDC sealed lead-acid rechargeable battery. Batteries supplied by DMP have been tested to ensure proper charging with DMP products. **GEL CELL BATTERIES CANNOT BE USED WITH THE XT30/XT50 PANEL.** Earth Ground Terminal 4 of the panel must be connected to earth ground using 14 gauge or larger wire to provide proper transient suppression.

Discover how to effectively install a battery to your solar panel system and enhance your home's energy independence. This comprehensive guide covers essential tools, safety precautions, and a detailed step-by-step
