Tycorun's battery swapping cabinets are designed to support efficient and rapid battery exchanges for electric bikes and scooters. The company's technology includes automated systems for managing battery inventory, monitoring battery health, and ensuring seamless swaps.

Battery swap cabinets can support the frequent battery replacement needs of these services, adapting to the complex traffic conditions of cities and meeting the on-demand travel needs of users. Furthermore, battery swap cabinets can reduce the occupation of city charging stations, optimizing the allocation of urban electrical resources.

TYCORUN ENERGY provides a complete set of solutions and business consulting for battery swap station, including independently developed battery swap software and management system, motorcycle batteries designed for battery swap and battery swap cabinet with intelligent cabinet control system, and all of these can be developed with customized ...

Whether you require a standalone battery enclosure or shelving for an equipment shelter, outdoor battery cabinet or trailer enclosure, ICS Industries have a standard range available for immediate purchase, as well as custom designed equipment racks and battery shelves tailored to suit your specific battery storage configurations.
