

What's new in Laos?

What's new: The construction of a massive renewable energy base by the China General Nuclear Power Group (CGN Group) in Laos is scheduled to begin in June, marking the start of the largest single new energy project in Southeast Asia. The project will become the first overseas clean energy base to send electricity back to China.

How will Laos' new power base work?

The base will incorporate wind, solar, hydro and energy storage capabilities, and will feed into an existing power line that transfers power generated in Laos to China's Yunnan province, and a second planned 500kV power line between the two.

Does Laos have power exports to China?

Power exports to China have formed a key part of landlocked Laos' development strategy, with China Southern Power Grid Co taking a majority stake in the Laotian national power grid in 2020 to help develop the sector. The Reuters Power Up newsletter provides everything you need to know about the global energy industry. Sign up [here](#).

What is a new agreement between CGN & Lao?

The latest agreement, signed at the China-ASEAN Expo held in Nanning in southern Guangxi province, advances a memorandum of understanding on the proposed renewable energy base signed between CGN and the Lao government in October 2022.

Will China-Laos 500 kilovolt transmission line be built?

It will start simultaneously with the building of China Southern Power Grid's China-Laos 500 kilovolt transmission line for transferring the power to China, according to Zhang Chaoqun, president of CGN Energy International Holdings Co. Ltd., the overseas clean-energy business unit of CGN Group.

Does Laos have a high-speed railway line?

Laos, a member of China's ambitious Belt and Road Initiative, has already hosted significant infrastructure investment from China, including a recently-opened high speed railway line between the two countries.
