

Lorsque vous recherchez un panneau de protection pour batterie au lithium approprié, ...

Choosing a lithium battery protection board is an important task that requires a thorough analysis of the battery's features, the requirements of its use, and adherence to safety certifications. By carefully weighing these elements, you can make a knowledgeable choice that boosts both the safety and longevity of the battery.

Vous pouvez personnaliser les exigences de protection de diverses fonctions supplémentaires pour votre batterie au lithium, telles que la fonction de communication, le calcul SOC, l'estimation SOH, la fonction d'avertissement, la fonction d'enregistrement, la fonction d'affichage, etc. Tritek peut fournir à votre batterie une carte de ...

You can customize the protection requirements of various additional functions for your lithium battery, such as communication function, SOC calculation, SOH estimation, warning function, recording function, display function, etc. Tritek ...

This 4S 14.8V 10A Lithium battery Protection Board comes with over-charge, over-discharge, over-current and short circuit protection, for a variety of various shapes 3.7V lithium-Ion batteries. HX-4S-A10 is Small size, suitable for many ...

Max. Continuous Discharge Current 5A Max. Continuous Charging Current 2A Operating Temperature -40°C~60°C Number of Cells 2 Nominal Voltage 7.2V-7.4V Note: The protection board cannot be used for lithium iron phosphate batteries, hernia lamps, hand drill battery pack, electric fish battery pack,

BMS (Battery Management System) - a battery management system that is designed to monitor the status of batteries, control the process of charging / discharging the battery and protects the battery pack from short circuiting, overload, over/under voltage, over current protection.

Feature:4 string 16.8V 40A lithium battery protection board (comes with recovery function ...
