

Low voltage distribution cabinet GGD factory solar energy

GGD AC low-voltage distribution cabinets are suitable for power plants, substations, and industrial enterprises. This type of distribution cabinet is applicable to AC 50Hz power systems with a rated working voltage of 380V and a rated working current of 3150A, suitable for energy conversion, distribution, and control of power, lighting, and ...

GGD AC low-voltage power distribution cabinet is suitable for power distribution systems such as power plants, substations, factories and mining enterprises with AC 50Hz, rated working voltage 380V, and rated working current to 3150A. For distribution and control.

Product Summary The GGD low voltage switchgear is applied in power plant, substations dustry and mine corporations, etc., with rated voltage 400V, max operating current 4000A and rated frequency 50/60Hz. It can be applied as power conversion distribution control, distribution and control of power, lighting and power distribution, etc.The cabinet structure of GGD type adopts ...

The GGD Low Voltage Distribution Cabinet is designed and developed by the joint design and Development Group (LS) for low voltage switchgear set of the Ministry of Energy, widely used ...

The GGD Photovoltaic Grid-connected Cabinet is designed for solar photovoltaic grid-connected power generation systems. It serves as the electrical energy conversion, distribution, and ...

Key features include a high breaking capacity, rated short-time withstand current up to 50kA, flexible wiring schemes, easy combination, strong practicality, and a novel structure.

GGD type low-voltage fixed complete set of switchgear is suitable for power users such as power plants, substations, industrial and mining enterprises as AC 50Hz, rated working voltage 380V, rated current to 3150A distribution system as power, lighting and distribution equipment for power conversion, distribution and control. The product has high breaking capacity and rated short ...

GGD low-voltage distribution cabinet is designed according to senior management of energy ministry, general electric power. users and requirements of design department. The device is a innovative type of low-voltage ...
