Energy Storage Greece Project

How does Greece support energy storage projects?

Greece's subsidy support for winning energy storage projects in the upcoming tenders is generous. During the construction phase, all winning projects will receive a one-time payment of EUR200,000 per MW, which serves as a capital expenditure subsidy.

Which energy storage projects will be included in Greece's energy tenders?

The program's first and second tenders will focus on standalone energy storage projects connected to the Greek electricity transmission network. The tenders exclude the island network of Crete, which was linked to Greece's mainland power grid in 2021.

Does Greece have a 1 GW energy storage program?

The auction is part of Greece's 1 GW energy storage program. The country announced its 1 GW energy storage program in the summer with three separate tenders featuring 400 MW, 300 MW and 300 MW of capacity. The first tender awarded 12 energy storage projects in August, with 411,79 MW of capacity in total.

How much does energy storage cost in Greece?

For the first energy storage auction, the regulator has set a capped CfD price of EUR115,000 per MW per year. As a result, winning projects must participate in the energy market, such as Greece's wholesale electricity trading and secondary balancing services market. Each year, the government will assess the projects' market earnings.

What is Greece's energy storage program?

Greece's energy storage program will draw EUR341 million (\$372.3 million) from the European Union's post-pandemic recovery fund, which was approved last year by the European Commission. The program's first and second tenders will focus on standalone energy storage projects connected to the Greek electricity transmission network.

Will Greece fund 1GW of battery storage?

It is the first round of a state-led procurement aiming to fund up to a 1GW of battery storage. The Regulatory Authority for Energy of Greece has chosen the 12 winning projects of a battery storage tender with 411MW awarded aid.

The project "Hydro Pumped Storage Complex in Amfilochia" is the largest investment in energy storage in Greece. It is characterized as a Project of Common Interest, under the code name PCI 2.9, since October 2013 and a Strategic Investment, since 2014.

Greece's energy storage program will draw EUR341 million (\$372.3 million) from the European Union's

post-pandemic recovery fund, which was approved last year by the European Commission. The...

Greece's Regulatory Authority (RAE) has selected 48 projects with a combined capacity of over 1.5 GW as provisional winners in its second tender for battery energy storage capacity.

The pipeline of prospective battery storage projects now approaches 27GW, with over 500 projects granted a storage license. With support for 1GW of battery capacity to be auctioned 3 tranches this year, the results for the first auction of 400MW have been announced with a few winners, but lots of losers.

Athens, Greece, December 16th 2024 - Sungrow, the global leading PV inverter and energy storage system provider, is proud to announce the strategic partnership with KTISTOR Energy for the deployment of the innovative PowerTitan 2.0 liquid-cooled Battery Energy Storage System (BESS) across several key projects in Greece. KTISTOR is a leading and constantly evolving ...

Seven companies have won government support for 11 standalone battery projects at Greece's second energy storage auction, where 300 MW was offered.

The pipeline of prospective battery storage projects now approaches 27GW, with over 500 projects granted a storage license. With support for 1GW of battery capacity to be auctioned 3 tranches this year, the ...

The European Commission has approved a EUR1bn Greek aid measure package to support two renewable power production and storage projects in Greece. The Faethon Project includes the construction of two 252 MW solar PV plants, integrated molten-salt thermal storage units and an extra-high voltage substation, while the Seli Project includes the construction of a ...
