

Professional removal of high-rise solar panels

What is a professional solar panel removal & reinstallation service?

A professional solar panel removal and reinstallation service handles the execution of the work and administrative paperwork to ensure that your solar energy system is back on and operating as soon as possible.

Should you remove or reinstall solar panels?

One common reason for removing and reinstalling solar panels is to address roof leaks. If a roof leak is detected, it may be necessary to temporarily remove the solar panels to access and repair the underlying roofing structure. This process allows for thorough inspection and repair of the roof, ensuring its integrity and preventing further damage.

How difficult is it to remove solar panels?

The difficulty of removing solar panels can vary depending on several factors, including the mounting system and the complexity of the installation. While some homeowners with proper knowledge and experience may be able to handle the removal themselves, it is generally recommended to seek professional assistance.

How do you remove solar panels from a roof?

For smaller jobs, such as having your panels cleaned or repaired, the removal may be as simple as unbolting the panels from their mounting device and unplugging the connecting power wires below. Then, the panels will have to be remounted to the roof and reconnected.

How much does solar panel removal cost?

If you own your panels, solar panel removal will cost around \$300 to \$1,000 per panel. If the panels or glass need to be repaired, expect to spend an additional cost, somewhere between \$200 to \$1,000, depending on the extent of the damage. In some instances, the cost can run higher than \$1,000 per panel removed.
