

How do I get a battery report?

Type `powercfg /batteryreport` and press Enter. This command tells your computer to run a battery report. When you hit Enter, the system will confirm that it has generated the report and saved it on your computer. Navigate to the file location to find your battery report. The default location is usually `C:\Users\[Your Username]\battery-report.html`.

What is a battery report?

The Battery Report gives you details such as how many hours your laptop was charged for, screen on time on a single charge, your battery's model number and type to find a compatible replacement battery, etc.

How do I know if a battery needs a replacement?

The section with the most information you want is the "Installed Batteries" section, which gives a general overview of the battery, including name, manufacturer, serial number, chemistry, design capacity, and cycle count. If you want to know whether the battery needs replacement, look at the "design capacity" and "full charge capacity."

Should you check your battery report?

Regularly checking your battery report can preempt potential problems, saving you from unexpected shutdowns or reduced battery life. So, don't wait--run your battery report today and get a detailed look at how your battery is doing. And remember, this simple action can go a long way in extending the life of your device.

How to read a battery report in Windows 10?

Reading a battery report in Windows 10 is easier than you might think. This report gives you a detailed look at your laptop's battery health and life. You'll need to use a built-in Windows tool to generate the report, which you can view in your web browser. Let's walk through the steps to make it happen.

How do I keep a long battery report?

You can select "HTML report" from the view menu and have it outputted as an HTML table. You can also clear the log. However, unlike the Windows Battery Report log, this one only shows what happened while it was running. So, if you want to keep a long log, you need to keep BatteryInfoView open at all times.
