

Rooftop solar power electricity subsidy standards

Are public buildings suitable for a solar roof?

This is assuming that 60% of public buildings are suitable and fall under the scope of the EU Solar Rooftop Standard. The EPBD will tap into the vast potential of rooftops, estimated at 560 GW by the EU Joint Research Centre earlier this year.

Will rooftop solar become a standard?

The EPBD will tap into the vast potential of rooftops, estimated at 560 GW by the EU Joint Research Centre earlier this year. Jan Osenberg, Senior Policy Advisor at SolarPower Europe said: "Like the essential integration of smoke detectors years ago, this new law propels rooftop solar toward becoming the standard.

Will the EU rooftop solar standard drive more rooftop solar capacity?

According to our analysis, the EU Rooftop Solar Standard within the EPBD could drive the installation of 150 to 200 GW of additional rooftop solar capacity in the EU between 2026 and 2030. Critically, the Solar Rooftop Standard will unlock the potential of large rooftops such as those installed on offices, commercial buildings, or car parks.

What is the solar rooftop standard?

The Solar Rooftop Standard will most importantly unlock the potential of large rooftops such as those installed on offices, commercial buildings, or car parks. Certain buildings such as agricultural and historic structures may be excluded. Osenberg continues: "Rooftop PV needs to be the gateway to smart electrification.
