When will Lyten's new battery factory come online?

Phase 1 of the facility is scheduled to come online in 2027. Lyten's factory will manufacture cathode active materials (CAM) and lithium metal anodes and complete assembly of lithium-sulfur battery cells in both cylindrical and pouch formats.

Where is Lyten battery made?

Lyten's factory will manufacture cathode active materials (CAM) and lithium metal anodes and complete assembly of lithium-sulfur battery cells in both cylindrical and pouch formats. Lyten has been manufacturing CAM and lithium metal anodes and assembling batteries at its semi-automated pilot facility in San Jose,Calif.,since May 2023.

Could a Nevada battery factory help reduce China's reliance on China?

The Nevada factory will start off supplying smaller-volume markets that are willing to pay more of a premium than automakers that "drive their costs down to nothing." Northvolt AB, the cash-strapped European battery maker, reached a deal to sell its US factory to a startup that's trying to reduce America's reliance on China for batteries.

What is Lyten's new lithium-sulfur battery facility?

The facility will manufacture cathode active materials, lithium metal anodes and assemble lithium-sulfur cells, enabling a 100% domestically manufactured battery. Lyten has signed a Memorandum of Understanding (MOU) with Dermody Properties to locate the facility on land owned by the Reno-Tahoe Airport Authority.
