Small battery industry enterprise recommendation meeting

How can we improve the competitiveness of the European battery sector?

The SRIA points to six imperatives necessary to help improve the competitiveness and of the European battery sector: Ensure that (BATT4EU) research results reach giga-factories and the markets, through pilots, demonstrators and improved decision making aided by digital tools.

What is the European Battery Alliance (EBA) high-level industrial meeting?

On March 23 was held in Brussels the European Battery Alliance (EBA) High-Level Industrial Meeting organised and hosted by EBA250-EIT InnoEnergy. This meeting brought together key stakeholders along a battery value chain to take stock of the achievements of the EBA since its launch five years ago.

What is the SRIA - A safe and sustainable battery design framework?

Implement a safe and sustainable by design framework for batteries, which plays to European strengths and which will help reduce emissions and use of substances of concern, improve safety and allow for the integration of smart functionalities. The SRIA sets out the priority for battery research and innovation in Europe.

What happened at the 7th high-level meeting of the European Battery Alliance?

7thHigh-Level Meeting of the European Battery Alliance main takeaways by the ChairMaros Sefcovic and the Council Presidency The 7thHigh-Level Meeting of the European Battery Alliance took place in Brussels on 1stMarch 2023, chaired by European Commission Vice-President Maros Sefcovic and organised in cooperation with the

Are there still gaps in the battery value chain in the EU?

Despite significant progress achieved in building the sustainable and vertically-integrated battery value chain in the EU - as reaffirmed during the sixth EBA Ministerial meeting on 23 February 2022, there are still gapsto fill in to ensure the deployment of a resilient end-to-end battery industry. These concern in particular:

Why is the European Battery Alliance important?

The discussion acknowledged that the European Battery Alliance has been playing a pivotal role in supporting progress towards the EU's climate neutrality goal by 2050,in delivering on the 2018 strategic action plan on batteries, and in allowing Europe's battery industry to achieve key milestones.

Despite significant progress achieved in building the sustainable and vertically-integrated battery value chain in the EU - as reaffirmed during the sixth EBA Ministerial meeting on 23 February 2022, there are still gaps to fill in to ensure the deployment of a resilient end-to-end battery industry. These concern in particular:

According to the China automotive power battery industry innovation alliance, the inaugural meeting and the
