

The result is the Adafruit bq25185 USB / DC / Solar Charger with 5V Boost Board! It uses the new bq25185 is a nifty charger chip with fairly high charge current, power path support, and the ability to charge from USB, DC or solar power. It's also a great value, so it's a good upgrade from MCP73833 or MCP73831-based charger boards.

Products AC/DC & DC/DC converters (integrated FET) TPS63000 -- High efficiency Buck-Boost Converter with 1.8A Current Switches in 3x3 QFN TPS63000-Q1 -- Automotive 1.8V to 5.5V Input Range, 1.8A High Efficiency Buck/Boost Converter TPS63001 -- 96% Buck-Boost Converter with 1.7A Current Switches, 3.3V fixed Output voltage in 3x3 QFN TPS63002 -- ...

Was hilft, wenn unterwegs der Handy-Akku und die Powerbank schlapp machen? Ein Solar-Ladegerät. Wir haben verschiedene Solar-Panels getestet.

The boost converter is the TPS61023, which will give up to 1 Amp output with good efficiency, to squeeze the most power possible out of your battery. This board is meant to be everything you need to power your 5V electronics: simply connect a 500mAh or larger battery to the JST PH 2-pin port, then charge it when you can from USB or DC/solar. At ...

Solar Power Manager 5V is a small power and high-efficiency solar power management module designed for 5V solar panels. It features as MPPT (Maximum Power Point Tracking) function, maximizing the efficiency of the solar panel. The module can provide up to 900mA charging current to 3.7V Li battery with USB charger or solar panel.

The result is the Adafruit bq25185 USB / DC / Solar Charger with a 5V Boost Board! It uses the new bq25185 is a nifty charger chip with fairly high charge current, power path support, and the ability to charge from USB, DC or solar power. It's also a great value, so it's a good upgrade from MCP73833 or MCP73831-based charger boards. The boost ...

This board is meant to be everything you need to power your 5V electronics: simply connect a 500mAh or larger battery to the JST PH 2-pin port, then charge it when you can from USB or DC/solar. At the other end is a terminal block which will ...

The result is the Adafruit bq25185 USB / DC / Solar Charger with 5V Boost Board! It ... If the input is a solar panel, the charging chip will adjust the current draw so that the voltage does not dip below the battery, thus optimizing the solar power input. No large capacitor needed to stabilize it, and you get near-MPPT capability without the cost and complexity of ...
