With the help of this controller, 18V solar panels can charge 60V and 72V batteries, while many controllers cannot. This boost MPPT solar controller can be used for electric vehicles, Golf Carts, ebike, camper trailers, marine, yachts, RVs, Trike, electric three-wheeled/four-wheeled vehicles to effectively increase driving distance, or for home ...

You need at least six 12V panels wired in series to go into an MPPT charge controller that supports 72V battery banks, like the Midnite Classic 150. H. Hobotrek New Member. Joined May 11, 2020 Messages 2. May 12, 2020 #7 Ok, so the reason I need it to stay 12 or 24 volts is because I will be putting the six panels on the truck. I planned on two on the ...

A 72V MPPT (maximum power point tracking) solar charge controller is a device that is used to regulate the charging of a 72V battery bank from a solar panel array. It is typically used in off-grid solar power systems, such as those found in RVs, boats, cabins, and other remote locations.

This high voltage MPPT solar controller is suitable for solar off-grid power system, it will automatically regulate battery charging and discharging. This controller supports 96V 84V 72V 60V 48V 24V 12V battery systems, and supports handling solar panel inputs up to 230V.

I asked them what kind of controller I could use for my solar panel, and they recommended this one to me. I used it very well and gave it a 5-star praise
