

What services does a solar EPC company offer after installation?

After installation, the solar EPC company will offer after-sale services like maintaining your system through equipment monitoring and maintenance. When working with a licensed solar EPC company, all the services are under one contract for the entire project.

Why should you choose a licensed solar EPC company?

When working with a licensed solar EPC company, all the services are under one contract for the entire project. This means that you only have one bill to pay, and you don't have to outsource for any services involved in your system's construction.

What is a solar EPC company?

What is a Solar EPC Company and What Services Does It Offer? EPC in the solar industry means engineering, procurement, and construction. It is a term that is widely used by companies that provide end-to-end solar energy services, including designing the system, giving procurement details about the system, and installing it.
