Are Chinese solar panels sold to Europe?

An investigation found that a Chinese solar panel is sold to Europe far below its normal market value. The duties will be imposed to alleviate the harm that is caused to the European industry by this unfair trade practice, dumping.

Does the EU impose a dumping duty on solar panels?

the imposition of measures is not against the Union interest. On the basis of these findings, it has been decided to impose an anti-dumping duty in a two-staged process: for two months, a duty of 11.8% will have to be paid, whereas from 6 August, duties ranging from 37.3% to 67.9% (averaging 47.6%) will be levied on solar panels from China.

Why did the escalation of solar panel antidumping lead to a trade war?

In the lead up to the Paris Conference the sharp reduction in the price of solar panels installed in Europe induced by the Chinese imports was seen by many as positive for EU's climate policy goals. Thus, the escalation of the solar panel antidumping case brought the EU and China to the brink of a trade war.
