Solar batteries can be installed both indoors and outdoors in accordance with AS/NZS 5139:2019. The best location for them is the garage where it is out of direct sunlight. As per the Clean Energy Council regulations, all Battery Energy Storage systems needs to be installed to comply with the current versions of AS/NZS 5139:2019.

A correctly sized solar array is required to charge the battery while also supplying the loads. As explained in more detail below, you must ensure the solar array is large enough while taking into account local conditions, including average solar irradiance throughout the year (peak sun hours), shading issues, panel orientation and tilt angle ...

Can Solar Batteries Be Installed Outside? Some solar batteries can be installed outdoors, but several important considerations must be considered. The feasibility of outdoor installation depends on factors like battery type, climate, and, in some cases, local regulations. The type of solar battery you have or plan to use plays a significant role.

Learn where to install solar batteries in your home and what factors to consider, such as ...
