

## **Solar photovoltaic power generation manufacturers pass China certification**

How many EPD photovoltaic modules have been certified?

The modules that have been certified are monocrystalline mainstream modules, with a total of 6 series and 43 sub-models. It is currently the sole domestic project with the largest number of products that have passed the Italian EPD photovoltaic certification at the same time.

Why did JinkoSolar get LCA & EPD certification?

JinkoSolar obtained the first LCA certificate in Greater China and the Italian EPD photovoltaic certification at the same time, further delivering on its corporate social responsibility and product strength, and will help improve market competitiveness of modules.

Why do you need an LCA certificate for PV modules?

Obtaining the first LCA Certificate for PV Modules in Greater China, as well as having completed the EPD registration certification, are not only industry standard recognitions of our product quality but evidence of our strong commitment to social responsibility.

Who is CGC solar project review agency?

CGC is the designated project review agency for China's Golden Sun Demonstration Project. Its customers include the top ten manufacturers in terms of shipment volume. CGC has issued over 3,600 PV product certificates and has served more than 60 GW of solar power plants.

China's PV module manufacturers want to sell their products to foreign markets, such as Europe and America, relevant certificates are always needed, which cost much money and time for ...

Yingli Solar's products have obtained a number of high-quality PV module certifications granted by the world's leading service providers, passed international product certifications by Europe, the European Union, the United States and other countries, and have been awarded product certifications from China Quality Certification Center. These ...

CCIC-SET PV lab provides "one-stop" testing and certification services to PV enterprises. When positively tested by our PV lab, products will acquire certificates from famous foreign or domestic certification bodies based on GB standard, IEC/EN standard and UL standard. CQC is China's largest and a world-leading certification body.

China Quality Certification Centre (CQC) is the first certification body authorized by the Chinese government to carry out green building materials product certification for PV modules and ...

Solar panel manufacturers must adhere to various international and regional certification standards, which

## Solar photovoltaic power generation manufacturers pass China certification

serve as benchmarks for quality, safety, and performance. These certifications are not only crucial for market ...

CQC provides assessments and certifications to photovoltaic manufacturers through cooperation with laboratories. With the CQC WMT certification, LONGi can now implement photovoltaic module certification tests based on the international standards of IEC 61215 and IEC 61730 in its own laboratory.

With that said, the contribution to the total electric energy production remains modest as the average capacity factor of solar power plants is relatively low at 17%. Additionally, of the 6,412 TWh electricity that was produced in China in 2017, 118.2 Twh was generated by solar power, which is equivalent to 1.84% of total electricity production ...

most innovative solar module manufacturers in the world, today announced that it has obtained the first photovoltaic module LCA (Life Cycle Assessment) certificate in the Greater China region issued by TÜV Rheinland ( China ) Ltd. (TÜV Rheinland), and concurrently passed the Italian EPD certification. The modules that have been certified ...
