For most homeowners, the decision to install solar panels is primarily driven by cost. The average cost of solar panels as of Spring 2024 was \$3.40 per watt, excluding financing. This price includes both hard costs, like hardware and equipment, and soft costs, like installation labor costs, solar loan costs and fees, and required permitting.

According to price data from the National Renewable Energy Laboratory, prices have dropped by over 60% since 2010! Despite being cheaper, the technology has only gotten better. Most solar panels today have efficiency ratings between 19% and 21%, a 48% increase from efficiency ratings in 2010. Calculate how much solar panels will cost for your ...

Price Per Solar Panel. You might also see solar panel systems priced by the panel. This metric is often used to price DIY solar panel kits, which we may recommend for your RV or boat but not for your home. It's true that panels do differ in price depending on their make, model, and efficiency. Higher-efficiency panels will likely cost more; however, you will not need ...

How much does a solar panel cost? Today's premium monocrystalline solar panels typically cost between \$1 and \$1.50 per Watt, putting the price of a single 400-watt solar panel between \$400 and \$600, depending on how you buy it.
