Will Iran expand its home-grown infrastructure for lithium batteries?

TEHRAN, Jul. 10 (MNA) - Iran is planning to expand its home-grown infrastructure for production of lithium batteries to respond to the electrification needs in its automotive sector, a senior official in the country's defense ministry announced.

Why did Iran launch a lithium battery plant in March?

The defense ministry launched Iran's largest plant for production of lithium battery packs in March to increase production capacity by 35% and to remove any need for imports of the product. MA/Press TV

Can Iran make lithium batteries for electric vehicles?

Reza Shojaei, who serves as a deputy head at the Iranian defense ministry's department for energy resources, said on Tuesday that Iran has the technology needed to design and manufacture lithium batteries that are used in electric vehicles.

When will electric cars be available in Iran?

Industry minister Abbas Aliabadi said on Monday that some 3,000 new charging points for electric cars will be available across Iran by March 2025. The defense ministry launched Iran's largest plant for production of lithium battery packs in March to increase production capacity by 35% and to remove any need for imports of the product.

Who makes car batteries in Iran?

Co,- Guitachrome Co. PJS - Nirugostaran - Azarbattery Co is one of the biggest car battery manufacturers in Iran. We produce various batteries from 50 Ah to 225 Ah. Our annual production is about 800,000. We are ready to cooperate in any fields with Iranian and foreign companies. Product types: batteries automotive starting.

Does Iran have a plan to electrify its transport system?

Iran has major plans to electrify its transport system both via imports of electric cars and by relying on domestic manufacturing. The country has been expanding its charging stations network to allow a speedier introduction of electric transport.
