The UK battery regulations, formally known as "The Waste Batteries and Accumulators Regulations 2009," set out the responsibilities for the collection, treatment, and recycling of waste batteries in the UK. These regulations ...

The amount of waste portable batteries and accumulators collected, measured in tonnes, is lower than the average sales over the last three years. Between 2009 and 2022, collection of waste batteries increased steadily in almost all countries. Only 1 country, Portugal, reported a smaller collected tonnage in 2022 than in 2009.
