

What is the best price for colloidal batteries

Is Higher PPM Better in Colloidal Silver? No, not necessarily. While high PPM sounds like more value, there's a catch. Higher concentrations (above 30 PPM) often have larger silver particles, which are less bioavailable. Extreme cases, like 500 PPM, you're likely dealing with silver proteins--a form of silver that isn't true colloidal silver and poses a risk of long-term ...
