What should I do if my battery is swollen?

**Do Not Charge or Use:** Do not attempt to charge a device with a swollen battery. Continued use can further stress the battery and increase the risk of rupture or fire. **Wear Safety Gloves:** Before handling the battery, wear safety gloves to prevent any unwanted chemical reactions if the battery leaks.

What should I do after removing a battery?

Once you have removed the battery, you should do two things immediately. First, insulate the contacts of the battery (if exposed) with a piece of electrical tape. The last thing you want is for something to short the terminals out.

What should I do if my battery is bulging?

When you discover a bulging battery, unplug the device immediately and turn it off as soon as you can. Continued charging or use could lead to a fire or explosion.

What should you do if a battery leaks?

**Wear Safety Gloves:** Before handling the battery, wear safety gloves to prevent any unwanted chemical reactions if the battery leaks. **Avoid Puncturing or Pressing on the Battery:** Never try to puncture or force a swollen battery to its original size. This can cause it to rupture and release harmful chemicals or even catch fire.

What should I do if my phone has a bad battery?

**Develop correct charging habits:** Don't charge your phone when the battery level is below 20%, and try not to let the battery level exceed 80%. Unplug the charger when the phone is fully charged, and avoid exposing the phone to extreme temperatures or environments! (Click here to see: [Develop 6 good charging habits](#))  
**Regularly check the battery:**

How do I dispose of a swollen lithium-ion battery?

When disposing of a swollen lithium-ion battery, we strongly encourage you to call ahead and ask if the facility is equipped to accept a damaged battery and to check what the protocol is for bringing the battery in. Do not simply toss a swollen battery into a general battery recycling bin at your local big-box electronics store.

It can, but it probably won't matter. Batteries do degrade with use, and keeping your laptop running while closed, 24/7, will definitely affect the optimum lifespan of the battery. However, so long as you shut it off when you're not using it and don't accidentally leave it running you shouldn't have a problem.

Sadly, particularly with an older iPhone, the damage from the bulging battery may prevent a repair from being
