

# What to do if the solar power supply in the courtyard does not light up

How do you fix a solar light not working?

To fix solar lights not working, check and remove the battery pull tab, replace or deep charge the batteries, repair any damaged wiring, clean the solar panels, and ensure they're positioned in direct sunlight. [How Do You Reset a Solar Light?](#)

What should I do if my solar light is flooded?

In the event of water intrusion, do the following: Make sure your light is switched off. Open your solar light/solar panel and gently dry off all components - pay special attention to the sensor. Carefully re-assemble it. Place it in a dry, warm spot to dry off even further. Go ahead and manually test the light to see if it still works.

How do you fix a faulty solar panel?

To repair this problem, you can clean the solar panel with a soft cloth and some soapy water. Just be sure to avoid using any abrasive cleaners or scrubbers, as these can damage the panel. One of the most common reasons why outdoor solar lights stop working is because of dead or faulty batteries.

What should I do if my solar panels are not charging?

**Trim Any Shade-Casting Foliage:** Look around your solar lights for any branches or foliage that might be blocking the sun. Trimming these back will help your panels get clear sunlight, which is essential for charging.  
**Keep Panels Clean:** Regularly clean off any dirt, dust, or bird droppings from your solar panels.

How do you stop a solar panel from turning on at night?

A quick and easy test is to trick them into thinking it's night by covering the solar panels. Grab a dark cloth or a piece of cardboard and cover the solar panel completely. You want to block all the light--like it's the middle of the night. No peeks of light should get through, because even a sliver might keep them from switching on.

How do you keep solar lights off?

Move the solar lights away from street lamps or bright lights to prevent the sensors from being "tricked" into staying off. Dust or water buildup on the solar panel reduces charging efficiency. Regularly clean panels to maximize sunlight absorption and prevent circuit damage from water ingress. [Why Might Your Solar Lights Be Off?](#) 1.

Solar lights are environment-friendly, cost-effective, and a great way to light up your backyard or garden. Nevertheless, a couple of reasons can cause them to stop working, including dead batteries and dirty solar panels.

Fixing solar lights can seem daunting, but with a little patience and some basic troubleshooting skills, you can
