

ZAMBIA is set to start making car batteries by end of July this year following the launch of the assembly plant at the Jiangxi Economic Cooperation Zone (Jiangxi MFEZ) in Chibombo. The vehicle battery ...

German startup, CMBlu, unveils its SolidFlow battery system, a promising solution for long-duration energy storage in EV charging. Currently undergoing tests in Chicago, this innovative flow battery technology could revolutionize the integration of renewable energy and address the challenges of EV charging.

The complementarity of the resource endowments of our two great nations is well able to support the emergence of robust value chains across a host of manufacturing sectors such as batteries, electric cars and the renewable ...

ZAMBIA is set to start making car batteries by end of July this year following the launch of the assembly plant at the Jiangxi Economic Cooperation Zone (Jiangxi MFEZ) in ...

Government has confirmed the completion of the feasibility study of an electric vehicle (EV) battery manufacturing facility plant, with positive results indicating that Zambia has enough facilities to set up the plant.

In December 2022, at a sideline event during the U.S.-Africa Leaders Summit in Washington, the United States signed a trilateral memorandum of understanding (MOU) with the Democratic Republic of the Congo (DRC) and Zambia for the development of an integrated value chain for the production of electric vehicles (EV) batteries. This MOU aims to develop a ...

The surge in demand for rechargeable batteries, driven by smartphone usage and renewable energy storage needs presents vast opportunities for Zambia and the continent ...

ZANIS reports that Mr Mulenga was speaking when he toured the battery manufacturing plant at the Zambia-Jiangxi multi- facility Zone in Chibombo District today, where he said that the plant will also manufacture power storage batteries that can withstand the adverse effects of climate change. He explained that for the first time after Mansa batteries, ...
